Hi Kieran,

Hope to receive the coordinates of the location where you have found ReSea bags as soon as possible, and to receive photos and information about the ReSea bags you have in your warehouse tomorrow Monday - so that we can take action on the matter.

Also if I may ask: How have you gotten entry into Indonesia under the current restrictions? We intended to travel to Jakarta already last month but are still held back by the current entry restrictions.

My WhatsApp number is +45 23255626

Best regards

Hi Kieran

Noted. Will be awaiting your response on Monday.

Please also send the coordinates of the location where you have found Resea bags, at your earliest convenience - so that we can send our management to inspect the site.

Thank you.

Best regards

Ann Sofie Gade

Hi Ann,

The labels are still on the bags, I'll be back in our warehouse on Monday. I'm involved in ocean cleanups for the next few days.

Anyway you guys have a broken link in the chain. We will be more than happy to help recycle  all of it.

Again my WhatsApp number is +62 813 1668 1688

Best regards!

Kieran

Hi Kieran,

This is disturbing news and we will look into the matter.

Will you please send us the coordinates of the location where you have found ReSea bags? Then we will have our local management visit the location and investigate.

Our bags of plastic are labeled so that we can track which waste bank they have been delivered too.

We will be taking immediate action on this.

Best regards

Ann Sofie Gade

Emne: Ocean Plastic

Good morning from Jakarta.

We need to talk about the dumping of plastic and greenwashing. We collect over 2,675,000 kilos of plastic with the last few weeks. We collect plastic in multiple regions around the world. Mostly with indigenous fishermen in these regions. We collected lots of plastic with the last few months that was dumped into the rivers in bales and bags. Hundreds of tons of this plastic is belong to ReSea. The entire token programs will be badly damaged due to this dumping.

Please reach out on WhatsApp and I can show you this plastic.

Plus for some strange reason oil was added to the bags of plastic after it was collected. This of course is only creating a bigger environmental problem. We're sitting on 20 truck loads of this ReSea plastic.
